

Submitter: Samuel Kent

On Behalf Of:

Committee: Senate Committee On Housing and Development

Measure: SB1051

Please vote YES on SB 1051 -2. Our communities desperately need more housing and this bill will help produce more affordable housing. The land use planning system is objectively not working to incentivize affordable development. We are in a crisis and things need to change. This bill will not cause massive sprawl or cause anything negative in real life. Those fears are overblown. This bill will simply help produce more housing, which our communities need. Why is that bad? Please make important change this Session by supporting SB 1051!
