

Submitter: Diana Buck

On Behalf Of:

Committee: House Committee On Behavioral Health and Health Care

Measure: HB2002

Basic healthcare is a human right. No one should experience barriers to reproductive and gender-affirming care. And no medical practitioner should fear prosecution for providing these services. As I watch policy changes happening throughout our nation, I fear for my safety and that of my loved ones. This bill would make Oregon a safer place for its residents of all genders. I implore you to support this bill.
