

Submitter: Gary Maass

On Behalf Of:

Committee: House Committee On Behavioral Health and Health Care

Measure: HB3090

I am a high school PE/Health teacher and working with teenagers I can see first hand the danger of flavored tobacco. I have discussed the use of these products with my students and most of them don't support it being available to their age group. This is a very important bill that if passed will only help our youth.
