On Behalf Of: Sanity
Committee: House Committee On Judiciary
Measure: HB2006

Representatives,

In regards to HB 2006

How do you square allowing a 15 year old to be shot full of drugs with no long term safety standards that are procedural to a change in their sex, without parental permission? I wonder if you tell them how statistically high thoughts of suicide are for those who have been transgendered. (around 80%) Or how do you square allowing young girls to kill a baby in their womb at the same tender age expecting no blowback as they reach maturity and realize what they have done, again without parental permission? How do you square suggesting a 16 old has enough grasp of how today's politicians operate to allow them to vote?

Yet you want to prevent an under 21 year old who would be trained from owning a firearm and who has maybe used and owned one for years, especially if farm raised?. Add in that you're okay to have an 18 year old serve the Country being equipped with firearms?

I'm thinking your hypocrisy kinda goes off the charts when you take all this into consideration.

How do you sleep at night? Seriously, I really want to know.

Sincerely,

Sally Klein
