

Submitter: M Lisboa

On Behalf Of:

Committee: House Committee On Behavioral Health and Health Care

Measure: HB2002

Who will be responsible for and all medical complications, or adverse reactions as a result of the "gender-affirming" care being provided to the minor without any notification to the child's parents or legal guardians? What happens IF the minor suffers a severe complication while at home while the parent has NO idea about the treatment their child has received? WHO will pay for the resulting hospital bills from future ER visits?

WHAT happens if the child becomes unconscious while at home and the parent calls 911 without ANY knowledge of the treatments his/her child has been receiving?

Is the STATE going to take full responsibility of the medical consequences of these irreversible procedures?

Can the child SUE the state IF he/she ends up regretting the double mastectomy (performed while a minor) once they reach adulthood?

All medical procedures and treatments carry RISK. Who will be responsible IF the child dies during surgery or as a result of any of these medical treatments?

I strongly OPPOSE this bill.

The state must respect parental rights and protect the parents' ability to CARE for their minor children. True consent cannot happen when we all know that the brain doesn't fully develop until the early 20s. Why allow a minor to decide on an irreversible procedure that may sterilize them?

STOP this bill at once!!

STOP supporting the mutilation of our children.
