

Submitter: Jill Wyatt

On Behalf Of:

Committee: House Committee On Behavioral Health and Health Care

Measure: HB2002

This takes away the rights of parents to have input into their child's physical and mental health care. Follow the real science of dysphoria and not the popular liberal agenda. Children need parental guidance, love and care. They also need rational mental health care. These decisions of minors will have lasting impacts on what they will be when they are fully decoupled mentally and physically. This is a disastrous proposal.
