Committee: Senate Committee On Housing and Development

Measure: SB1051

SLOW DOWN!! There is this panic mindset to build 140,000 homes yesterday. Don't undo decades of planning responsibly. Please insure communities can handle the increase burden on infrastructure, schools, the natural environment, access to mass transit and local job opportunities. Examples of this pack em' in mindset to bring down costs is not building sustainable and livable communities. I'm a witness to this in Washington County. Pay attention to what the citizens of these areas, the environmental groups, business leaders and farmers under assault are telling you. Responsible well planned communities over these drastic steps to meet the political agenda of today. Oregon had a net decrease in population last year. Multnomah County residents are fleeing because of horrendous taxation and livability concerns. Give these policy amendments a long and serious review to understand what these rule changes are doing to our state.
