

Submitter: Angelita Morillo

On Behalf Of:

Committee: House Committee On Behavioral Health and Health Care

Measure: HB2002

Dear Elected Representatives,

Please support HB 2002. Women, trans people, and gender non-conforming people are having our human rights revoked all over the country. I've always been proud to live in Oregon because this is a state where queer people have been able to be safe and thrive without government interfering on private matters. This legislative session we've seen numerous anti trans bills get a hearing, and that should signal to all of our representatives that trans people and women in our state are under attack. Be on the right side of history, keep Oregon a safe haven for trans people, women, and anyone else who needs access to comprehensive healthcare.

Sincerely,

Angelita
