

Submitter: Judith Fardig
On Behalf Of:
Committee: House Committee On Judiciary
Measure: HB2006

The developing brain does not reach full maturity of the frontal cortex where decision making and executive function occur until about age 25. I support this bill but would amend it to increase the age to 25. Too many young people, especially males, have poor impulse control and too easy access to guns. Let's save Oregon lives by making them wait a bit longer to purchase their own firearms.
