

Submitter: Selina Anderson

On Behalf Of:

Committee: House Committee On Behavioral Health and Health Care

Measure: HB2002

This is a huge decision and I work in mental health. I have witnessed regret after starting sex change therapy and think that there should be age limits. I think it should include intensive therapy and specialized health care providers. I think it should cost so people don't just do it because they can and are unhappy then regret it later. I think Doctors should have the right to not engage in this treatment and that people should be able to disagree with this bill and not have legal consequences.
