

Submitter: Amber Dawson

On Behalf Of:

Committee: House Committee On Behavioral Health and Health Care

Measure: HB2002

I absolutely in the strongest terms oppose this governmental overreach! HB 2002 sets to undermine parents and health risks are compounding. Children need sound advice from parents, not from people who just want to mutilate tender aged children to push their own agenda. If anyone else assaulted a child as this bill suggest, they would be in prison. This isn't reproductive health it is in FACT the opposite. You simply take away the chance for changing their mind later with severe and detrimental consequences. We should be protecting these children. Section 9 is absolutely inappropriate.

This is totally a political ploy and you all should be ashamed for supporting this. I am the parent, these children can stay on my insurance until they are 26. Proving they cannot support their own Healthcare and the Legislature contributed to that. Just STOP
