

Submitter: Linda Lanzhammer

On Behalf Of:

Committee: House Committee On Behavioral Health and Health Care

Measure: HB2002

Hello,

I'm writing to express my concern about women not having access to proper reproductive care and services. I feel that it is vital that women can choose whatever service they require since generally they are the ones bearing the consequences of pregnancies resulting from rapes, incest (among other causes,) as well as simply not having access to proper prenatal care. I'm a mother who relied on Planned Parenthood at one time for my contraception services. I want women to feel empowered to have control over their bodies without legislation forced upon them. Please vote YES on HB 2002.
