

Submitter: Maripat Hensel

On Behalf Of:

Committee: House Committee On Judiciary

Measure: HB2005

It's really important to me as a Oregonian who has 3D printed projects at Portland Community College and at home using our family's printer that we take the time to keep firearms that can be created using technology that continues to be easier and more readily available from being used as a way to get around gun sense legislation because these firearms do not have serial numbers and ways to manage sales. We must be able to detect guns and implement legislation that ensures we know how to check where and how firearms are made and manufactured. Please vote for this bill and keep Oregonians from harming each other with ghost guns now and into the future.
