

Submitter: Gary Nelson

On Behalf Of:

Committee: House Committee On Behavioral Health and Health Care

Measure: HB2002

Quit sugar-coating abortion by calling it reproductive rights. Nothing about abortion relates to reproduction, call it what it is, infanticide. These unborn children are living human beings and deserve our respect and protection. I do support protection for prospective mothers whose lives may be in jeopardy by the pregnancy and birth and for instances of rape and incest. For the sake and safety of our yet-to-be-born brothers, sisters and children in general please oppose HB2002.
