

Submitter: Angela Morgan

On Behalf Of:

Committee: House Committee On Behavioral Health and Health Care

Measure: HB2002

I would like to respectfully submit my wholehearted opposition to HB 2002. As a parent of six children, I see this bill as a direct infringement on my parental right to protect my children. We all know that children are not always able to discern the consequences of their decisions, and as a parent, I am responsible for providing the loving guidance my children need as they grow up. This bill would undermine that ability by allowing my underage children to make life altering decisions without my knowledge or consent. I strongly oppose HB 2002.
