

Submitter: Susan Leonard

On Behalf Of:

Committee: House Committee On Behavioral Health and Health Care

Measure: HB2002

I am writing in support of HB2002. Reproductive rights belong to individuals and should not be decided by legislators. It is my right to make decisions about my health in consultation with my physician. Physicians have the right to provide care to their patients based upon the science of medicine without interference from people who disagree with the care they are providing. If someone doesn't believe abortion or gender-affirming care are right for them, just don't have that kind of care. But they should not be allowed to tell me or others what is right for us.
