

Submitter: Erin Kenzie

On Behalf Of:

Committee: Senate Committee On Education

Measure: SB595

I support more funding for TAG services. Differentiating instruction for TAG students takes time and resources. The Oregon public schools are currently losing many of their top students to private schools and homeschool charters because their needs are not being met in their neighborhood schools. Any student who is not provided an environment in which they are challenged is not receiving the education they are entitled to. Please pass this measure.
