

Dear Chair Nosse, Vice-Chairs Goodwin and Nelson, and Members of the Committee,

I wish to express strong support for House Bill 2002.

I am very concerned about the national trend currently to punish health care providers and ban gender affirming care.

This bill would protect at least Oregonians from fearing persecution and reaffirm our rights to individually make our own decisions about our health care according to what is individually best for us.

Sincerely,

Susan Hornung
