

Submitter: Jim Welsh

On Behalf Of:

Committee: House Committee On Judiciary

Measure: HB2006

This is response to the person who said 'The frontal cortex of the brain, that controls decision making, is not fully developed until approximately 25 years of age.' But it is ok for them to vote at 16 years old, and make life altering decisions without parental consent at 14 years of age and younger even though the frontal of the brain is not yet fully developed? I urge a NO vote HB 2006.
