

Submitter: Michael Manley

On Behalf Of:

Committee: House Committee On Behavioral Health and Health Care

Measure: HB2002

I wish to address section 3 of this bill. It is every persons right to determine their own health care not someone else's. Where did the idea come from that one individual can be judge and jury over another's life? This is wrong and we are going down a road that leads to a degrading of human life at any age that doesn't fit with the religious view of evolution. That unborn has ever bit as much right to live as anyone else, we don't get to decide (as an individual) who lives and who dies!
I also think it would be wise to investigate this pill that induces abortion more completely as to its safety.

Gender is assigned by God at birth and cannot be changed by man! All this identity identification in children needs to be dealt with in a professional manner, not by suggesting they have any changes done to their appearance by surgery or drugs. How can we hold parents accountable for actions committed by their minor children and then withhold health information from those who are held responsible for their upbringing?
