

Submitter: Mia Susanna Krizo

On Behalf Of:

Committee: House Committee On Behavioral Health and Health Care

Measure: HB2002

Oregon State Legislator,

I oppose the forced conflation of women's right to control their own bodies and the medical transitioning of people experiencing gender dysphoria. The first named is a life-saving procedure that saves women all around the world and it doesn't harm the mother. The latter is an experimental medical procedure that leaves people sterilized and unable to revert back to their previous healthy bodies. 45,000 active members on a de-transitioner site is an astronomical number and must be brought down to 0. I'm not opposed to surgery for any adult who truly wishes to alter their bodies in any shape or form, but I do not wish women's rights to be used to accomplish it as these two are separate issues and must remain so.

Thank you,  
Susanna Krizo
