

Submitter: Sandy Shook

On Behalf Of:

Committee: Senate Committee On Natural Resources

Measure: SB85

First let me thank you Senator Golden for all your work on this issue. I'm very happy that the moratorium is for poultry only as I believe this is where major problems exist for our children, our water and air. I believe that the moratorium on Tier 2 CAFOs be no less than five years. Equally important is Tier 1 CAFO,s be included in the moratorium so they are not allowed to begin construction and just wait out the moratorium expiration. The shorter moratorium is not protective enough to give the legislature and state agencies enough time to fix the law. The quality of our environment in this community depends on this. Thank you
