

Submitter:           brenda sisson

On Behalf Of:

Committee:        House Committee On Behavioral Health and Health Care

Measure:           HB2002

To Whom This May Concern,

The law is written as to NOT allow minors to make decisions without parental consent for GOOD reason.

It is NOT the states position to act as an authority to undermine a parents Rights of said child.

Children do not have any reasonable perception of future changes, consequences, effects. This comes with experiences and age. Thus, the parents being older than a child.

I oppose this Bill HB2002. It sends the wrong message to the very foundation of structure in family dynamics eliminating care, involvements, and personal/intimate relationships of child/parents.

Thank you for your astute consideration.

Best Regards,

Brenda Sisson
