

Submitter: Lee Richey

On Behalf Of:

Committee: House Committee On Behavioral Health and Health Care

Measure: HB2002

I find it difficult to believe that the State of Oregon is considering allowing minors to choose medical procedures and techniques that are proven to be life threatening as well as being irreversible without the consent of the child's parents. This is a total usurpation of parental rights and I ask that the legislature oppose now and eliminate this bill from future consideration.

Sincerely,

Lee Richey
