

Submitter: Kathleen Johnson

On Behalf Of:

Committee: House Committee On Behavioral Health and Health Care

Measure: HB2002

Please vote on on HB2002. It is the duty and right of parents to take care of the health and make decisions for their minor children, those 18 and under. The government should have no say in these decisions. It is not the duty of schools to advise children as to their choice of medical decisions. This bill has no redeeming values.
