

Submitter: Judy Vandehey

On Behalf Of:

Committee: House Committee On Behavioral Health and Health Care

Measure: HB2002

Wake up. We've heard over and over that the human brain is not fully developed until the age 25. Why are you adding to the mental health crisis in Oregon? My husband and I recently did some traveling and we met people from all over the country. When we said we were from Oregon, they "cringed". As a lifetime resident of Oregon with over 150 years of family generations here, I'm embarrassed to live here. It's time to stop pushing this radical agenda on our youth and making hard working citizens with moral values pay for it.
