

Submitter: Annika Minten

On Behalf Of:

Committee: House Committee On Behavioral Health and Health Care

Measure: HB2002

I oppose HB 2002. This endangers our easily impressionable youth. The parents must be informed about these life changing decisions regarding their precious children. Each child is unique and no one knows this better than their own father or mother. Parents are uniquely qualified to protect their children with regards to all medical decisions. These hormones and gender changing surgeries are permanent life altering decisions and cannot be made without parental guidance. I strongly oppose HB 2002 and hope that you will consider the horrible impact this could have on future generations.
