

Submitter: ROBERT MORSE
On Behalf Of: PSJH
Committee: Senate Committee On Health Care
Measure: SB1076

Passage of this bill will be a disaster for small critical access hospitals in rural Oregon. We are already just barely managing with short staffing and other post pandemic constraints. This puts additional burden on an already stressed health care system that will only result in further limitations of care and access. Putting the burden on an already stressed health system related to homelessness is simply bad policy.
