

Submitter: Paul Emge

On Behalf Of:

Committee: House Committee On Behavioral Health and Health Care

Measure: HB2002

Simply put, any law which forces a medical provider or educational institution to provide birth control, perform abortions, or change a person's sex, which is and was easily determined at birth, is **WRONG!!**

This is another attempt to force taxpayers to support activities they do not support.  
Please vote against this bill.
