

Submitter: Jenny Pompilio

On Behalf Of:

Committee: Senate Committee On Natural Resources

Measure: SB85

As a physician, public health advocate, mother and outdoors enthusiast I oppose the bill if amended. As amended, the bill limits the benefits of any moratorium and endangers the public health and natural ecosystems around mega- poultry and dairy organizations. The moratorium needs to be for ALL such farms if it is to truly address public and ecological health. Do not allow this bill to be weakened by powerful lobby interests who only care about money.
