

Submitter: Lori Peila

On Behalf Of:

Committee: House Committee On Behavioral Health and Health Care

Measure: HB2002

I oppose this highly volatile bill. It erodes the basic values of our family structure, Minor children are not capable of making life changing decisions such as abortions, drug treatment, or gender transition. Parents are a Childs closest guide through the complicated trials and tribulations of youth. They are unable to play sports, take school trips, and a myriad of other activities without parents consent and notification. It is ludacris to think of giving them the responsibility of these momentous decisions. Please keep our children in your best interest and oppose this bill.
