

Submitter: Summer Sears

On Behalf Of:

Committee: Senate Committee On Natural Resources

Measure: SB85

Please STAND STRONG on SB 85-1 and REJECT the proposed -2 amendment.

My understanding is that the new amendment would weaken the bill to only include chicken factory farms, not the mega dairies and pig farms that are especially hard on our environment.

Jobs and industry are very important and yet -- NOT important enough to sacrifice our environment or to warrant the cruelty imparted.

Thank you,
