On Behalf Of:

Committee: House Committee On Judiciary

Measure: HB2005

I oppose HB 2005. It is a poorly thought out Bill that will criminalize otherwise law-abiding citizens while having no effect on those who may use a gun for criminal purposes. A entirely different Bill written to maximize penalties for criminals while using a undetectable firearm during the commission of a crime could make sense. For centuries, Americans have been lawfully assembling their own firearms and used them responsibly and legally. it is important not to conflate undetectable firearms ownership as a whole with criminal activity.
