

Submitter: Sani Adam
On Behalf Of:
Committee: House Committee On Judiciary
Measure: HB2005

2nd Amendment is in the Constitution to limit the government infringing into right of the people.

Any rule against the 2nd Amendment is infringement to that right. Leaders of this state are very serious when it comes to any rights, they even start making up rights and insert it into the Constitution, such as abortions, which is not rights nor it is in the Constitution, while convicts are being released from prison and law breakers are let to do violent crimes in the streets without any consequence.

Just about anything I possess in the house can be used as lethal weapons. Owning them is not a crime.

We already have enough laws, we just don't have the willing to enforce them. It doesn't make any sense to add anymore when we are not adhering to the regulations that we already have. This bill will only infringe on law abiding citizens, and make them criminals in the eye of the law.

Stop making up laws that will only punish law abiding citizens, and start implementing and enforcing the laws we already have. We already have laws against murder, or acting violently against another human. Yet you are releasing people in jail. Yet you make abortions legal. And now you are making more rules, knowing it is already hard for law enforcements to respond to any phone call and you also want to defund the police.

Stop making up laws that will only punish law abiding citizens, and start implementing and enforcing the laws we already have.
