

Submitter: Tony Newbill
On Behalf Of: CAFO SB 85
Committee: Senate Committee On Natural Resources
Measure: SB85

Dear Senate Natural Resources Committee , Please consider that limiting CAFOs in Oregon will cause economic duress to livestock producers and the Consumers by limiting the Free Market marketing abilities that price the commodities in all sectors right down to the consumer .

I know it sucks that we have to do things like this but without this most efficient way to be productive to keep Food Prices as low as possible , food prices across the board will rise without this source of protein because this source of protein makes the most efficient use of all the other commodities to produce a higher percentage of protein per pound of consumable proteins .

Thank you for your time and service and have a great day .
