

Submitter: Kathleen Richie

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure: HB2990

As we struggle to survive more and more climate changes the important piece is going to be our ability to act locally. When I consider what might be the best way to do that I think of setting up community-based centers very much like the ones in this bill. We need to know and care for each other, share resources and skills, knowledge, etc. We've drifted the wrong direction but 'every man is an island' is not going to save us. In fact it's a key contributor to what has got us here!
