

Submitter: john wojda

On Behalf Of:

Committee: House Committee On Judiciary

Measure: HB2005

HB 2005 is completely unnecessary and would only make current law abiding citizens of the defined items criminals. This is nothing more than a back door ban on items allowed under federal law and US and Oregon constitution. No gun is traceable. A serial number does nothing after the initial purchase of a firearm, and nothing in the event an item is stolen or handed down from parent to child. As an 'independent' registered voter, this pushes me further away from Democratic candidates, as the bill doesn't address the core issues of crime; only the tool of certain criminals, and blankets the law-abiding folks in legal peril.
