

Submitter: Craig Thiry

On Behalf Of:

Committee: Senate Committee On Housing and Development

Measure: SB611

Forcing any business to have a cap when you are not aware of what inflation may reach, as well as reducing profitability when new homes are needed, will be counter-productive to riding the solution to this housing problem. Instead, spend government dollars to help subsidize housing, and don't screw the >50% of landlords who are small business owners in your districts.
