Committee: Joint Committee On Ways and Means Subcommittee On Natural  
Resources

Measure: SB5509

Given the dire summary report from the IPCC that went public 3/20/23, the status of emergency for this bill and others, is undeniable. Assuring our rivers remain viable is one small but EXTREMELY important piece of mitigating the forth coming catastrophic effects of the climate crises. SB 5509 must pass with no cuts in the stated funding proposed in the bill. Like good breathable air, we need healthy water flows - this is about survival. Please, fund ODFW by passing SB 5509. All our flora and fauna depend on healthy rivers and streams. Thank you!
