On Behalf Of:

Committee: House Committee On Behavioral Health and Health Care

Measure: HB2002

This is a horrible bill! What were you all thinking? I absolutely oppose this bill 10,000%.

You are taking away parental rights & that is wrong! These kids are our kids, not yours! More and more information is coming out weekly about the devastating effects of transitioning at early ages. A quick search pulls up a significant amount of individuals who are now suing their doctors for transitioning them at such early ages, with little to no regard for the physical & mental health of these CHILDREN. We make kids wait to smoke, get tattoos, drink, etc until 18 years of age or older, but hey go ahead & make life altering decisions, without your parents consent or knowledge, at 15 years of age, that's wrong!

The changes to the abortion portion of the laws will essentially allow newborns to be killed after birth, because no one will be allowed to look into the cause of death?! Again, this is wrong & really evil.

I again want to voice my complete opposition to this horrific bill. It needs to be thrown in the trash heap.
