

Submitter: Alison Krochina

On Behalf Of:

Committee: Senate Committee On Natural Resources

Measure: SB85

Oregon could be the leader in how business and honoring the earth are profitable.

Factory farming by its very name is an unnatural disgrace of "efficient" greed.

Greed does not benefit the land or citizens of Oregon in the long run.

In the end it makes a disaster of our water and our quality of life - which is why people want to live here. Tell the factory's to go back to where the people have no conscious or better yet come up with a better idea of what it means to farm.

Hold people accountable to the greatness that exists in them.

Do not let them get away with this. You are the gatekeepers, you are taking responsibility for our future. Do not waste it on dollar signs.
