Measure: HB2004

Hi! Ranked choice voting will mean that our community can vote on issues not just a party. This means we will improve the conditions in our state because the best ideas will rise regardless of party. Wouldn't you like a better chance at getting votes from a different party because there is no fear. For example, when I vote for green candidates, it's pretty likely I'd follow that with a blue vote (depending on the issues), but in this system, it'd basically seem like I voted red (depending on the issues)...Imagine being able to gain all those "3rd party" votes...
