

Submitter: Barb Reuter
On Behalf Of:
Committee: House Committee On Judiciary
Measure: HB2005

I cannot imagine a more frightening future than a world in which exists untraceable "ghost guns". What is the need to sell ghost guns when our nation has the largest number of handguns, rifles and military grade weapons, many more than our total population, already?! Please vote yes to prohibit the manufacture and sale of untraceable ghost guns and punish those who attempt to do so.
