

Submitter: Ruby Mason

On Behalf Of:

Committee: Senate Committee On Housing and Development

Measure: SB1051

The housing crisis has only gotten worse over the last 8 years. It is very disturbing to see the number of people including families with children and those with mental disabilities living in tents without adequate weather protection, sanitary facilities, heat, running water or garbage service. This poses health and safety risks for everyone in our communities. The need has never been more urgent. Shelter is one of our most basic needs. In order for us to begin to address the issue of homelessness and the health and safety issues that homelessness creates, we need to develop more housing units as quickly as possible. Please support SB1051.
