

Submitter: Robert Replogle

On Behalf Of:

Committee: House Committee On Judiciary

Measure: HB2005

In the context of the recent New York State Rifle & Pistol Association, Inc. v. Bruen Supreme Court decision, this proposed bill is unconstitutional. There is a definite historical and traditional American precedent of home building firearms since before and after the founding of this country. If passed this unconstitutional bill will infringe on the right of law abiding individuals to express their 2nd amendment rights to manufacture firearms for their own personal use. The bill will definitely be challenged in the courts, wasting time and taxpayers money.
