

Submitter: Linda Robinson

On Behalf Of: Most Oregonians

Committee: House Committee On Behavioral Health and Health Care

Measure: HB2002

I am writing this strong opposition not only for myself but for everyone I know....AND for all Oregonians who are oblivious to the disaster included in this bill.

I oppose providing abortions for girls/students of all ages, especially without their parents or guardians knowledge and support.

I oppose providing sex change medications and surgeries as they are dangerous and irreversible which makes them child abuse....especially without knowledge and support of their parents or guardians.

I oppose the high cost of this bill ultimately paid by Oregonian tax-payers without their consent. HB 2002 is a Mecca for people with a whole series of problems who see answers as very expensive medical treatment paid by us!

I oppose this bill because it protects the providers and individuals administering this child and adult abuse while criminalizing Oregonian citizens trying to stop this abuse.

We do not want this!! Vote NO on HB 2002!
