

Submitter: Carol Cercone

On Behalf Of:

Committee: House Committee On Judiciary

Measure: HB2005

I am strongly in favor of Bill HB 2005. There is no purpose to have these guns for any other reason than to do harm. These guns are undetectable, untraceable which presents a serious threat to public safety in Oregon. To have the ability to build a firearm from parts and kits widely available online-without a background check- or using a 3D printer and create a gun that can't be detected or traced is unacceptable in our society. These could be brought into our schools, government offices, and planes.

Please vote YES on this bill.

Carol Cercone
