

Submitter: D Motley
On Behalf Of:
Committee: House Committee On Judiciary
Measure: HB2005

Seems as though this proposal will make it illegal to carry any given firearm part with out the remainder. Can I carrel a barrel without the bolt or action? May I carry a magazine without the weapon? Might I carry a gunstock without any metal parts attached to it? Has anyone researched how many gunstocks are made in woodshop classes in our schools to determine how many kids we'll be jailing if they take their project home? If so, please publicize this number for us!! How about triggers? A metal part integral to a firearm, but useless without one. May I carry a trigger without any other firearm part? What if I have a barrel and a trigger with no action? Or a barrel and a stock without a trigger? Can you see how silly this gets? I don't like "ghost guns" either, but you can do better, be clearer than this. As it is, this bill is folly for the courts!!
