

Submitter: Jacob Taylor

On Behalf Of: ARC PDX volunteer

Committee: Senate Committee On Natural Resources

Measure: SB85

I am in support of this bill - factory farms are damaging our health and our planet and need to stop growing. Support for factory farms means support of pandemics, obesity, cruelty for animals and humans, excessive CO2 emissions, etc.

Let Oregon be the first state to address this western issue and keep sustainability and health a priority for all people and animals
