

Submitter: Ray Slason

On Behalf Of:

Committee: House Committee On Behavioral Health and Health Care

Measure: HB3090

Vaping is the most effective cigarette cessation product on the market (multiple times more effective than the next product) and has already saved millions of lives, thousands here in Oregon and they will save many more if not limited by over-reaching legislation.

Amending the current bill to allow flavored products in 21 and over stores only would protect the thousands of Oregonians employment and livelihoods that is being threatened here.
